

Inception Report

Verifications of Disbursement Linked Results
Tinfissi-Joseph Ilboudo, Chief Section and Program Coordinator

The United Nations Economic Commission for Africa (UNECA) signed an agreement with the East African Community (EAC) to undertake verification of the subset of Disbursement Linked Results (DLRs) of the “Eastern Africa Regional Statistics Program for Results (EARSPforR)”. The inception report outlines the framework for the implementation of this task by UNECA.

1. The Terms of Reference (ToR)

1.1. The Objectives

The contract (in its Appendix A) layout the following components of the project:

a) Kenya

The aim is to provide high-quality, disaggregated statistics to support sustainable development:

- i. *Effective National Statistical System. Provide support to strengthen the legal and institutional framework of the national statistical system through the production of county statistical plans, as well as the annual updating of the national indicator framework to monitor progress towards the SDGs.*
- ii. *Data Quality. Provide support to fill key data gaps through household surveys to monitor poverty and labor indicators, and establishment surveys to produce sectoral statistics and update Kenya's national accounts, as well as support for measures to improve data quality such as post-enumeration surveys and adherence to the IMF's Data Quality Assessment Framework.*
- iii. *Adequate infrastructure for statistical production. Investment in the infrastructure required to produce high-quality timely statistics, including a modern data centre and an updated sampling frame for household surveys, as well as improvement of the human resources of the national statistical system through the implementation of a program of capacity building.*
- iv. *Statistical Advocacy. Promote statistical advocacy and access through the use of an advanced release calendar, as well as an updated national strategy for the development of statistics.*

b) Rwanda

The aim is to improve the coverage, frequency, timeliness and quality of official statistics while enhancing their use.

- i. *Produce statistics to support evidence-based decision-making. Sustain and enhance core data production at NISR and enrich and expand data supply across the national statistical system, including carrying out population and establishment censuses, and household surveys on labor*

- force, poverty, and health, sectoral and business surveys, collection of price and macroeconomic statistics, and strengthening administrative records in the education area.*
- ii. Lead a national data revolution to deepen statistical impact. Equip and operationalize the NISR Data Science Campus to facilitate data access, promote innovation and build capacity in data science and big data analysis, including equipping with technology and software, developing new workstreams in training and research, and expanding partnerships and advocacy initiatives.*
 - iii. Build statistical capability across the NSS to promote data uptake and use. Improve data uptake and statistical literacy through strategic communication, dissemination and advocacy and enhance capacity for data production and statistical analysis.*
 - iv. Strengthen the enabling environment for sustainable statistical development. Invest in technology to increase efficiency in data production by upgrading NISR network and security infrastructure.*

c) Tanzania

The aim is to strengthen the national statistics systems in Tanzania for the production of quality statistics for decision-makers in an objective, timely and cost-effective manner:

- i. Harmonization, Data Quality and Dissemination. Improve the regulatory environment and quality control procedures, adopt and harmonize data exchange standards, adopt and implement data quality assessment frameworks, and harmonize and standardize survey methodologies, as well as promote online data dissemination, enhance access through data portals, promote interactive use and visualization of data, and improve user engagement and statistical literacy, and skills to use and interpret data by the government, the media and others.*
- ii. Data Production to Enhance Policy and Decision Making. Support frequency and cost-effectiveness of household surveys for poverty and welfare monitoring, integrated labour force surveys, population and establishment censuses, enterprise surveys and informal sector surveys; expand the collection of price statistics; and develop protocols for improving automated sharing of administrative data among agencies.*
- iii. Infrastructure & Institutional Development. Invest in information communication technology systems, networks, and physical infrastructure to equip and upgrade the branch offices of the National Bureau of Statistics (“NBS”) and the Zanzibar Office of the Chief Government Statistician (“OCGS”); and build human capacity to use advanced statistical production methods and adopt innovations to incorporate the use of big data.*

1.2. Disbursement Linked Indicators

The progress of the EARSForR will be assessed with sets of Disbursement Linked Results (DLR). The Disbursement Linked indicators (DLI) assigned to UNECA are DLI 1.1 (Improved harmonization and quality of statistics); DLI 2.2 (Improved availability of enterprise-based survey data); DLI 2.3 (Improved availability of agricultural statistics); DLI 2.4 (Improved availability of administrative data); DLI 2.5 (Improved availability of price & macroeconomic statistics); and DLI 2.6 (Gained experience with big data

sources and new technologies). For each of the countries concerned, there are sets of more detailed indicators set out over the five years of the project (see Annex VI in the contract).

1.2.1. DLI 1.1 Improved Harmonization and quality of statistics

a). Kenya

- Y3. a) Results for the post-enumeration surveys on the mapping and census of schools and, Kenya Continuous Household Survey (KCHS) available online.
- Y4. (b) Data Quality Assessment Framework (DQAF) compiled and available for 3 macroeconomic datasets.
- Y5. (c) Harmonized 5 dimensions of statistics according to applicable regional guidelines.

b). Rwanda

- Y2. (a) Published metadata for household surveys following international standards.
- Y4. (b) 90% of UN gender minimum indicators published.
- Y5. (c) Harmonized 5 dimensions of statistics according to applicable regional guidelines.

c). Tanzania

- Y1. (a) Data quality assurance framework (guidelines) developed and adopted for statistical production for all data to be produced under TSMP2.
- Y2. (b) IMF DQAF compiled and published for 4 datasets.
- Y4. (c) Harmonized 5 dimensions of statistics according to applicable regional guidelines

1.2.2. DLI 2.2 Improved availability of enterprise-based survey data

a). Kenya

- Y1. (a) International trade in services survey conducted, report produced and available online.
- Y2. (b) Census of establishments (COE) conducted, report produced and available online;
(c) Micro Small and Medium Enterprises survey report and microdata available online;
(d) Rent and housing survey conducted, report produced and available online;
(e) Real estate survey conducted, report produced and available online.
- Y3. (f) Census of Industrial Production (CIP) conducted, report produced and available online;
(g) Integrated Survey of Services (ISS) and Survey of Road Transport (Passenger & Freight), warehousing, air and water transport conducted, report produced and available online;

- Y4. (h) Foreign Investment Survey conducted, report produced and available online for 2022-2024; (i) Survey of Villas, Cottages, Apartments, and Camping Sites conducted, report produced and available online; (j) Informal sector survey including mining conducted, report produced and available online.

b). Rwanda

- Y2. (a) Disseminated results of the Integrated Business Enterprise Survey for 2022 and 2023.
- Y5. (b) Disseminated results of the Integrated Business Enterprise Survey for 2024 to 2025.

c). Tanzania

- Y2. (a) Statistical Business Register (SBR) updated to 2022 through an establishment census with report and anonymized microdata online
- Y3. (b) Comprehensive enterprise survey conducted in 2023, covering formal and informal MSMEs and large enterprises
(c) US\$ 1.5m Census of Industrial Production (CIP) 2023 completed, reports and anonymized data available online
- Y4. (d) Statistical Business Register updated to 2024 through administrative data.
- Y5. (e) Two reports with results of Annual and Quarterly Survey of Industrial Production for reference years 2024 and 2025 produced and disseminated and anonymized micro-data available where possible (US\$ 0.5m per survey)
(f) Employment and Earnings Survey (EES) 2022, 2023, 2024, and 2025 completed (US\$ 0.5m per survey).

1.2.3. DLI 2.3 Improved Availability of Agricultural Statistics

a). Kenya

- Y2. (a) Pilot for the Census of Agriculture undertaken, and report produced and available online.
- Y3. (b) Basic Statistics report produced and published online for Census of Agriculture.
- Y4. (c) Results and microdata for Census of Agriculture made available online.

b). Rwanda

- Y2. (a) Disseminated results of the seasonal agricultural survey for 2021 and 2022.
- Y5. (b) Disseminated results of the seasonal agricultural survey for 2024 to 2025.

c). Tanzania

- Y5. (a) IAS completed for 2022, 2023, 2024 and 2025, with report disseminated and anonymized microdata well documented, archived and available online.

1.2.4. DLI 2.4 Improved availability of administrative data

a). Kenya

- Y1. (a) Report on training conducted on community-level cause of death reporting produced and made available online
- Y2. (b) Report on Mapping and Census of educational institutions available online.
- Y3. (c) Annual Agricultural report produced and available online for 2022/23-2023/24;
(d) Survey on Non-Communicable Diseases conducted, report published and available online.
- Y4. (e) Annual Vital Statistics reports produced and published online for 2023 through 2025 calendar years jointly between Kenya National Bureau of Statistics (KNBS) and Civil Registration and Vital Statistics (CRVS);
(f) Dissemination of service delivery indicators report for FY2022/23 - 2025/26

b). Rwanda

- Y2. (b) Publication of preliminary results of the 5-RPHC.
- Y3. (c) Publication of thematic reports and district profiles using data from 5-RPHC;
(d) Disseminated results of the Establishment Census.
- Y4. (e) Publication of disaggregated data for promotion, repetition, dropout indicators in the Education Statistical Yearbook.

c). Tanzania

- Y1. (b) Manual and tools for integrating administrative data in the Tanzania NSS for filling data gaps in the monitoring of SDGs and official national statistical indicators.
- Y2. (c) Publication of preliminary results of the 2022 PHC and 10% random sample available online for users; (d) Publication of regional profiles using data from 2022 PHC and an interactive dashboard including a mapping platform is available on the NBS and OCGS websites for all census variables.
- Y3. (e) Integrated database/ data center of administrative data that is relevant for producing official statistics for three sectors for URT (Mainland and Zanzibar).
- Y5. (f) Administrative data portal for internal government data sharing for URT is operational providing access to a comprehensive integrated data set for eight MDAs/Non-State Actors (NSAs).

1.2.5. DLI 2.5 Improved availability of price & macro-economic statistics

a). Kenya

- Y1. (a) ICT survey and Remittance survey conducted, report produced and available online.
- Y3. (b) Rebased Consumer Price Index (CPI) series produced and available online.
c) Informal cross-border trade survey conducted, Inbound and outbound survey conducted, report produced and available online;
- Y4. (d) Survey of Non-Profit Institutions and cooperatives conducted, report produced and available online; (e) Rebased Producer Price Index (PPI) series produced and available online.
- Y5. (f) Monthly harmonized CPI (HCPI) survey conducted, and reports produced for 12 months 2022/23 - 2025/26;
(g) Revised national accounts produced and available online;
(h) GCP report produced and available online for FY2022/23 -FY2025/26.

b). Rwanda

- Y2. (a) Monthly consumer and producer price indices available online for 2022 to 2023.
- Y3. (b) Report for Travel Expenditure survey published for 2022 and 2023;
(c) National accounts published with 2022 as base year, including SUT and SAM.
- Y4. (d) Monthly consumer and producer price indices available online for 2024 to 2025.

c). Tanzania

- Y1. (a) National Accounts integrated for URT and rebased to base-year 2019, and Social Accounting Matrix (SAM) and Supply and Use Tables (SUT) updated and available for users (partial disbursement of US\$ 0.5m for SUT).
- Y2. (b) Timely release of quarterly GDP estimates for 2022-2023 and subsequent revised estimates.
- Y3. (c) Harmonized and improved price data collection and rebasing of CPI completed;
- Y4. (d) National Accounts for General Government, rest of the World (BoP), financial corporations and non-financial corporations for URT and tourism satellite accounts for Zanzibar completed and reports released.
- Y5. (e) National Accounts for URT rebased to 2024.

1.2.6. DLI 2.6 Gained experience with big data sources and new technologies.

a). Kenya

- Y2. (a) Infrastructure for a rapid response phone observatory set up and report produced.
- Y3. (b) Report produced on the use of remote sensing data to monitor agricultural outputs/productivity, environmental impacts or urbanization.
- Y4. (c) Report produced on the estimation of poverty using a machine-learning approach and/or geo-spatial tools.

b). Rwanda

- Y3. (a) Use and analysis of data from remote sensors to improve production of agricultural statistics.
- Y4. (b) Data Science campus is operational and capacity building plan in data science is implemented.

c). Tanzania

- Y1. (a) Completed geospatial database with information from Census 2022 and made available for users where justified.
- Y2. (b) Rapid Response Phone Survey Observatory completed.
- Y4. (c) Assessment of gaps and opportunities for using big data and three technical innovation reports on environment, poverty and agriculture produced using Big Data.
- Y5. (d) Remote sensing facilities upgraded including satellite imagery licenses/ software/ spatial data portal.

1.3. Milestones

For each of the Disbursement Linked Indicators (DLIs), the contract specifies the “milestones” or (outputs). The lists are available (in the column “Milestones”) in the table attached to this report.

2. Approach to the verification of the DLRs.

2.1.Verification procedures for each DLI according to the contract

Annex 6 of the contract specifies a set of verification procedures for each of the milestones listed under the DLIs. Besides, these are listed in the DLI Matrix table attached to this report. There are a few issues that may affect the verification to consider in the procedures:

I. Checking whether reports are available online.

The verification process involves examining reports that can be accessed online. However, there may be instances where websites experience temporary outages due to various reasons. Our team will make up to three attempts over three consecutive days to verify if the report is accessible. If it is not, we will make a note of it in the report. We will try to regularly monitor the availability of the published report. Hence, we will consider the milestone achieved if we can successfully access reports available online during our attempts.

II. Checking whether data is available online for DLI 2.2 and 2.3.

The verification procedure in DLI 2.2 and 2.3 includes “anonymized microdata well documented, archived and available online.” We may face delays in accessing the microdata to check their availability if the approval process takes a bit longer time. This will delay the team verification reports and meeting the deadline. But, if we get approval and check the data possible, we will consider the data as available.

2.2. UNECA Approach to the verification Procedures

In the attached table (column “Details of ECA procedure”), we have indicated how we plan to approach the verification.

2.3. Overall Verification Process

Verification will happen four times (quarterly) in a year during the verification windows and will be coordinated by the RPCU. Before the verification window, UNECA (as the IVA) will receive an indication of which DLIs (i.e. how many) will need to be dealt with in the verification window.

During the verification window, UNECA will proceed as follows (in line with the procedure set out in the Contract agreement):

i. Preliminary assessment of the DLRs

The preliminary assessment will be held within 10 days including confirming supportive evidence/data, an onsite check, resolution of outstanding issues, and identification of issues that need further clarity or further documentation. The results will be communicated to the RPCU in a summary report.

ii. Draft IVA report

This will come in two parts, a *summary report* (confirming the DLRs achieved, outstanding issues to be resolved, and activities carried out by UNECA), and a *detailed report*, which will assess whether the DLRs have been achieved, a statement of the validity of supporting evidence and methodology, application of DLI protocols by implementing entities. This report will be submitted within 20 days of receiving the evidence.

iii. Final IVA report

This will be submitted within 28 days of the start of the verification window and will contain any additional amendments based on responses to the draft report.

2.4. Approach to the writing of the report.

The writing of the report will be based on the results of the implementation of the verification procedures, on-site visits, accessed reports and data from websites, verified documents and other means. Thus, the findings of the verification will be issued in the report while resolving any outstanding issues.

3. Structure of the final deliverables

Annex 1 of the contract provides an illustrative template of the final verification report. It has the following structure:

Executive Summary (Objective, verification protocols; methodology, the scope of work; Summary of results)

I. Introduction

1. Background
2. Disbursement-linked-indicator (DLI)
3. Independent verification

II. Methodology

Methodology for respective DLI

III. Detailed verification results for respective DLI

1. Inspection/ Review
2. Findings

IV. Conclusion

1. Advantages and challenges during the implementation
2. Lesson learnt and recommendations

Annexes.

This seems appropriate, although we will keep the details and the methodology section as brief as possible.

4. UNECA Team

Indications of the assignment of tasks are shown in the attached table in the column “**area of specialization**”.

4.1. Roles

a) Program Coordinator

The program coordinator is responsible for the overall management and coordination of the program. Communication, reporting and management of any problems are the role of the coordinator.

b) Statistician-Agricultural Statistics

The *Statistician-Agricultural Statistics* is responsible for leading the field mission, conducting the verification and report writing of related DLIs of the program on agriculture statistics.

c) Statistician-National Account Statistics

The *Statistician-National Account Statistics* is responsible for leading the field mission, conducting the verification and report writing of related DLIs of the program on the national account statistics.

d) Statistician-Price Statistics

The *Statistician-Price Statistics* is responsible for leading the field mission, conducting the verification and report writing of related DLIs of the program on the price statistics.

e) Statistician-Social Statistics

The *Statistician-Social Statistics* is responsible for leading the field mission, conducting the verification and report writing of related DLIs of the program on social statistics.

f) Expert- Geospatial Data

The *Expert- Geospatial Data* is responsible for leading the field mission, conducting the verification and report writing of related DLIs of the program on geospatial data.

g) Expert-Administrative Data

The *Expert-Administrative Data* is responsible for leading the field mission, conducting the verification, and report writing of related DLIs of the program on administrative data.

4.2. Establish the monitoring procedures.

The verification procedures for the DLRs will be undertaken for the entire life of the program. Hence, establishing efficient monitoring and reporting procedures with slight modifications will continue to help the delivery of the expected project results of UNECA on time and quality.

5. Work Plan

A summarized work plan by country, year and DLRs is presented in the table below.

Table 1. Summary of DLRs by Year and Country					
Country/Particulars	Number of DLRs per country				
	Year 1	Year 2	Year 3	Year 4	Year 5
Kenya	3	4	6	6	2
Rwanda	0	5	3	4	3
Tanzania	4	5	3	4	5
	Number of Days for DLR verification (assuming 5 days per DLR, and Country)				
Total days for DRL verification	35	70	60	70	50
Kenya	15	20	30	30	10
Rwanda	0	25	15	20	15
Tanzania	20	25	15	20	25
Inception report	0	0	0	0	0

Table 1. Summary of DLRs by Year and Country

Country/Particulars	Number of DLRs per country				
	Year 1	Year 2	Year 3	Year 4	Year 5
Report Writing (5 days per country per verification window)	35	70	60	70	50
Final IVA report per country (end of project)					65
Total days	70	140	120	140	115

6. Risk Mitigation Strategies

During EARSForR verification implementation, there might be risks encountered in the project. Hence, planning for risk mitigation strategies is quite useful to ensure that expected outputs are delivered on time and quality. The following are the expected risks and mitigation strategies.

Table 2. Risks by Impact, Probability and Mitigation Strategies

Risk	Probability	Impact	Mitigation strategies
Late request for verification	Medium	High	Close communication with RPCU and EAC.
Absence of program focal persons in project countries	Low	Low	Other program personnel contacted /requested for the task.
Difficulty in accessing platforms, and websites for verification.	High	High	Contact the program personnel and recheck websites.
Unavailability or inadequacy of documents.	Low	Low	Contact the program personnel to get documents.
Official and non-official holidays might be available on certain dates.	Low	Low	Reschedule appointment or mission.
Unavailability of external experts (staff) for verification.	Low	Medium	Roster two consultants for each DLR.
Identifying procedures of non-key experts.	Medium	Medium	Initiate the identifying process based on the projected programme of work.

7. Quality Assurance

Ensuring the quality of the expected deliverables is one of the fundamental priorities of the IVA. The UNECA strictly follows quality assurance mechanisms that enable the proper implementation of the verification protocols. Some of these are:

- i. Develop standard reporting templates and checklists for the DLRs.

- ii. Conduct the verification process independently in line with statistical principles and code of ethics.
- iii. Carry out verification procedures on time and compile progress reports checking their completeness and accuracy on the ground.
- iv. Produce verification reports on the agreed timeline.
- v. Periodic review of the verification protocol implementation with the team.
- vi. Execute other related quality assurance mechanisms.

Annex 1. DLI Verification Matrix

Annex 2. Financial payment installment

Annex 1. UNECA DLRs Verification Matrix

DLI Name	Yr	Milestones	DLI Description	DLI Verification Procedure	DLI Code	Details of ECA procedures	Area of Expertise	Provisional Onsite visit? (Yes, No)
DLI 1.1-KEN: Improved harmonization & quality of statistics	Y3	(a) Results for the post-enumeration surveys on the mapping and census of schools and, Kenya Continuous Household Survey (KCHS) available online	(a) KNBS conducted a post-enumeration survey on the mapping and census of schools and KCHS, and published results online;	(a) Verification that reports from the post-enumeration surveys on the mapping and census of schools and KCHS are available online.	A(i)	ECA checks post-enumeration surveys on the mapping and census of schools and KCHS reports are available online.	Social	Yes
	Y4	(b) Data Quality Assessment Framework (DQAF) compiled and available for 3 macroeconomic datasets.	(b) Compiled and published online DQAF for 3 additional sets covering the producer price index, external debt and household income in a poverty context.	(b) Verification that DQAF for 3 additional macroeconomic datasets have been compiled and published.	B(i)	ECA checks 3 additional macroeconomic datasets compiled and published.	National Account and Price	Yes

Annex 2. Financial payment installment

Viviane Mwitirehe

Coordinator, Statistics Project

East African Community

Arusha, Tanzania

Email: vmwitirehe@eachq.org

Date: 22 March 2024

Ref: PRM24-02-03-204-001-2-00001

Dear Ms. Mwitirehe,

Subject: **Call for Funds Second Installment of Output 1**

The United Nations Economic Commission for Africa (ECA) has signed an Agreement with the East African Community (EAC) for the provision of technical assistance to undertake verification of Disbursement Linked Results under DLI.

In line with the Payment Schedule, we wish to call for the release of the second instalment (Output1-Inception Report) amounting to **US\$137,892** (*United States Dollars One Hundred Thirty-Seven Thousand Eight Hundred Ninety-Two*).

For ease of reference, the following are the particulars of the ECA's Bank Account into which the funds should be deposited.

**UN ECONOMIC COMMISSION FOR AFRICA
JP MORGAN CHASE/INTERNATIONAL AGENCIES BANKING
1166 AVENUE OF THE AMERICAS, 17th FLOOR
NEW YORK, NY 10036-2708
US DOLLAR A/C No. 485000539
SWIFT CODE: CHASUS33 ROUTING # 021 000 021**

I would like to take this opportunity to thank you once again for your continued support and partnership.

Yours Sincerely,
