3. Data Analysis Support

We also seek the expertise of a data analyst who will:

- Support data cleaning efforts.
- Work closely with the demographer and our internal teams.
- Develop scripts and analytical outputs that will help streamline processing and reporting

4. Deployment of ECA Census Tools

To enhance our operational and monitoring capabilities, we kindly request the deployment and configuration of the following ECA census tools for Stats SL:

- Census Executive Mobile App
- Census Project Management Platform
- Census Field Monitoring Dashboard
- Census Issue Tracker Web Tool
- Census Dissemination Toolkit

These tools are critical to support high-level management, real-time monitoring, issue tracking, and post-enumeration data dissemination.

5. Digitalization of Census Instruments and Technology Solutions

This includes developing the census questionnaire in electronic format, provisioning census tablets, developing training manuals for field staff, and conducting training-of-trainers (ToT) sessions on the use of CSPro.

We believe that ECA's support in these areas will significantly enhance the quality, efficiency, and credibility of the 2025 Census.

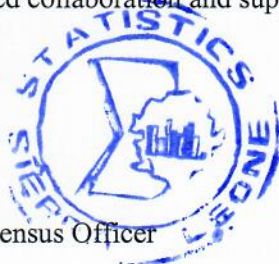

We are happy to provide any additional information or documentation needed to facilitate this request. Thank you for your continued collaboration and support.

Best regards,

Yours sincerely,

Andrew Bob Johnny

Statistician General/Chief Census Officer

*Statistics Sierra Leone (Stats SL), supervised by a Statistics Council, is a semi-autonomous institution established by the Statistics Act 2002 as the central authority for the collection, compilation, analysis and dissemination of accurate, clear, relevant, timely and high quality official and other statistics. **Andrew Bob Johnny** is the current Statistician General.*
