

STATISTICS MAURITIUS

Title: Virtual Training on Forest Ecosystem Accounts Training

Date: December 2025 to February 2026

Statistics Mauritius is pleased to confirm its interest in participating in the training initiative on Forest Ecosystem Accounts. This initiative aligns with our broader commitment to integrating environmental and economic data to support evidence-based policymaking and sustainable development.

While we recognize the importance of developing forest ecosystem accounts, we currently face constraints in terms of staffing and technical expertise in this area. We would therefore welcome technical assistance and capacity-building support to initiate and strengthen our work on ecosystem accounting. This training represents a valuable opportunity to contribute meaningfully to the advancement of environmental-economic accounting in Mauritius

Mukesh Dawoonauth
