

Mr. Jonathan Madi
Director, Human Resources
For Director-General
Zimbabwe National Statistics
Agency (ZIMSTAT)

Date: 11 November 2025
Ref.: ACS37-01-02-556

Dear Mr. Madi,

Subject: Request for Implementation and technical support on the performance management dashboard at ZIMSTAT

I acknowledge receipt of your letter dated 29 October 2025, requesting implementation and technical support from the Economic Commission for Africa (ECA) for the Performance Management Dashboard at ZIMSTAT. We appreciate ZIMSTAT's commitment to institutional performance, efficiency and accountability, and we welcome your interest in aligning with good regional practices for data-driven statistical management.

Subject to ECA's internal procedures, we propose the following way forward:

1. ECA will convene a joint virtual scoping session with ZIMSTAT to review system requirements, institutional readiness and priority Key Performance Indicators (KPIs). The session will inform a concise implementation plan setting out roles, deliverables and an indicative schedule.
2. Based on the assessment, ECA will support the configuration of the dashboard within ZIMSTAT's operational environment. ECA will also design and deliver targeted training on system use and administration and will hand over the solution to ensure national ownership and the institutionalization of sustainable practices.

Please nominate a focal point to engage with ECA counterpart for the scoping session. Upon confirmation, we will share the proposed agenda and timeline with you.

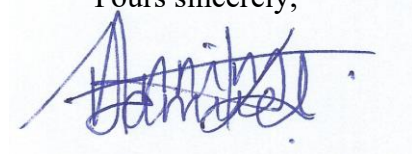

We appreciate ZIMSTAT's recognition of ECA's leadership in fostering innovation and digital transformation in official statistics and look forward to continued collaboration to strengthen statistical production and data use.

Menelik II Ave.
P.O. Box 3001
Addis Ababa, Ethiopia
